

School Vision, Mission and Educational Objectives

Elite International School is a private coed school covering Early Childhood, Elementary, Middle and High School. We are keen to establish and maintain a happy and purposeful community that enables children to thrive morally, socially, and intellectually and achieve excellence.

Vision

EIS empowers the hearts and minds of students by fostering educational excellence and emotional well-being.

Mission

We promote students' achievement and prepare them to become lifelong learners, equipped with 21st century skills, optimum knowledge and Qatari values.

Values

Respect
Responsibility
Communication
Excellence in teaching and learning

Objectives

Elite International School aims to create an educational system that will provide all students with knowledge and skills to succeed in college and careers, and as parents and citizens to provide high quality education to our students in Mathematics, Sciences, Social Studies, Languages, ICT, Etiquette and Protocol. EIS has a diverse and evolving environment that promotes excitement and interest in teaching and learning. We all operate as members of the school community and work as a team in order to meet the school's educational objectives which are:

- To enable students to exhibit effective oral and written communication skills in English, Arabic and French, allowing them to read, write, speak, and listen critically.

- To enable students to have an understanding of and ability to apply mathematical knowledge and skills in novel ways to solve complex problems.
- To enable students to use their science knowledge and skills to design and conduct experiments, as well as record, analyze and interpret data in various curricular disciplines.
- To adopt a student-centered approach in which students act as leaders and take decisions about their learning and choice of activities.
- To provide a differentiated curriculum that takes into account the needs of below level, on level and advanced learners.
- To provide a structured and individualized learning program for children with learning difficulties.
- To develop a sense of national pride and citizenship while engendering respect for diversity, individuality and differences.
- To promote the life skills of communication, cooperation, improving one's own learning and performance, problem solving and critical thinking skills so that a new generation of students, that is ready for the challenges of the 21st century, is nurtured.
- To make sure that all students use ICT tools effectively to explore, develop and interpret information and solve problems in a variety of subjects and contexts.
- To build students' characters and foster self-confidence, tolerance, honesty and integrity.
- To provide a framework for personal, social and health education at all stages through a system of homeroom teachers.
- To instill and integrate religious beliefs and principles that nurture emotional maturity and spiritual richness.
- To provide a variety of extra-curricular activities that nurture students' minds and bodies, giving them the opportunity to unleash their talents and potentials.
- To promote social responsibility among students so they fulfil their role as effective members of the community through on-going UNESCO projects.
- To provide Physical Education for all students and encourage them to get involved in physical activities that are focused on competing and performing, promoting health and well-being and developing personal fitness.
